

LIST OF TABLES

Table 2.1:	Stratigraphy of Langat Basin's regional geology	27
Table 2.2:	Different degree of salinity, plant tolerance and oil palm tolerance for various electrical conductivity ranges	40
Table 2.3:	Summary of land use activities at Carey Island (Golden Hope Plantations Berhad, 2006)	55
Table 3.1:	Types of groundwater based on TDS contents in mg/L (Fetter 2002)	98
Table 3.2:	Physical well and physical in-situ parameter data	99
Table 4.1:	Eleven years of rainfall data obtained from Department of Irrigation and Drainage (DID), Malaysia, 2009-2011, West Estate Carey Island Rainfall, Station No: 291312	136
Table 4.2:	Summary of percentage permeable materials (sand and gravel) from PSD results	144
Table 4.3:	Results for hydro-geochemical analysis of groundwater; water samples taken on 30 May 2010	156
Table 4.4:	Differential head of groundwater table in unconfined aquifer System	168
Table 4.5:	Differential head of groundwater table in semi-confined aquifer System	168
Table 5.1:	Data used for empirical relationships between subsurface resistivity and water resistivity and between subsurface resistivity and TDS	189
Table 5.2:	TDS and resistivity value for various different material types	195
Table 5.3:	Summary of percentage change in model resistivity	203
Table 6.1:	Summary of water types and area coverage/dominancy	217
Table 6.2:	Types of plants in different water qualities (Blasco et al., 2005)	218
Table 6.3:	Summary of conductivity distributions for the suitability of oil palm tree towards salinity and area coverage/dominancy	231
Table 6.4:	TDS value for the suitability classification for oil palm plantation	232
