### Chapter 1  Introduction

1.1 Objectives of the study  
1.2 Research hypothesis

### Chapter 2  Literature Review

2.1 Introduction to *D.fragilis*  
2.2 Taxonomy  
2.3 Biology  
2.3.1 Morphology  
2.4 Life cycle and host distribution  
2.5 Transmission  
2.6 Genetic diversity
Chapter 2       Diagnosis

2.7 Diagnosis

2.7.1 Preservative, staining and microscopy analysis.  15

2.7.2 In vitro culture  16

2.8 Ultrastructural description of D. fragilis  18

2.9 Molecular diagnosis  18

2.10 Symptoms  19

2.11 Treatment  20

2.12 Prevalence  20

Chapter 3       Methodology  28

3.1 Background on the Orang Asli and sample collection sites  31

3.1.1 Background on the school children and study areas  31

3.2 Sample size estimation  36

3.3 Data collection  37

3.3.1 Questionaire  37

3.4 Collection of fecal sample  38

3.5 Statistical analysis  38

3.6 Ethical committee approval  38

3.7 In vitro cultivation of D. fragilis  40

3.7.1 Genotyping by polymerase chain reaction (PCR) of D.fragilis  41

3.8 In vitro cultivation of Blastocystis sp.  41

3.8.1 Genomic DNA Preparation of Blastocystis sp.  41

3.8.2 Subtyping of Blastocystis sp.  42

3.9 Formal ether concentration technique of other intestinal parasites  44

3.10 Preservative methods for D.fragilis  46

3.18.2 Inoculation in rats

3.19 Detection of *D.fragilis* in rat fecal samples

3.19.1 Detection of *D.fragilis* using Loeffler medium

3.19.2 Detection of *D.fragilis* using PCR

3.19.3 Counting of *D.fragilis* trophozoites

3.19.4 Staining of *D.fragilis* trophozoites

3.19.4.1 Staining of smears from rat fecal sample using Modified Fields’ stain

3.19.4.2 Staining of smears from rat fecal sample using Acridine orange

3.19.4.3 Staining of smears rat fecal sample using DAPI stain

3.20 Ultrastructural studies on rat fecal sample

---

**Chapter 4 Results**

4.1 To assess the prevalence of *D.fragilis* in Orang Asli communities

4.1.1 Demographic characteristics

4.1.2 Socioeconomic characteristics

4.1.3 Prevalence of Orang Asli infected with *D.fragilis*

4.1.4 Gel electrophoresis

4.1.5 Demographic and socioeconomic characteristics for school children

4.1.6 Prevalence of *D.fragilis* infection among school children

4.1.7 Gel electrophoresis

4.2 Biology studies of *D.fragilis*

4.2.1 Various types of preservatives to fix *D.fragilis*

4.2.2 Cultivation of *D. fragilis* using various *in vitro* culture medium.

4.2.2.1 Growth profile of *D.fragilis* in Loefflers and Jones’ medium
4.2.3 Differentiating *D. fragilis* and *Blastocystis* sp. using staining

4.2.3.1 Differentiating *D.fragilis* and *Blastocystis* sp. using Iron haematoxylin, Modified Fields’ stain and Giemsa stain

4.2.3.2 Differentiating *D.fragilis* and *Blastocystis* sp. using cytochemical stain, 4’,6-diamidino-2-phenylindole (DAPI) and Acridine orange.

4.2.4 Life cycle of *D. fragilis*

4.2.4.1 *In vitro* growth profile

4.2.4.2 A distinct form of trophozoite seen in the 18th hr cultures

4.3 *In vivo* experimental infection

4.3.1 Sample source (Assessing cyst-like structure)

4.3.2 Examination of stools of infected rats every 6 hour post inoculation

4.3.3 Dissection on the 24th hour post-inoculation

4.3.4 Dissection on the 4th week post-inoculation

4.3.5 Direct microscopy examination.

4.3.6 Staining of *D. fragilis* using Modified Fields’ stain

4.3.7 Staining of *D. fragilis* from infected rats stain using DAPI and Acridine orange

4.3.8 Ultrastuctural studies.

**Chapter 5   Discussion**

5.1 Intestinal parasitic infection among Orang Asli namely *D. fragilis*

5.2 *D.fragilis* infection among school children

5.3 Influence of preservative

5.4 *In vitro* cultivation of *D. fragilis*
## Contents

5.5 Staining to differentiate *D. fragilis* and *Blastocystis* sp. 120

5.6 Cytochemical staining to differentiate *D. fragilis* and *Blastocystis* sp. 122

5.7 Evidence of another additional reproductive process 123

5.8 The existence of cyst-like structure 125

5.9 Limitation of the study 127

### Chapter 6 Conclusion  

6.1 Conclusion 129

6.2 Future studies 131
