ABSTRAK	II
ABSTRACT	V
ACKNOWLEDGEMENTS	VII
DEDICATION	VIII
LIST OF FIGURES	XIV
LIST OF TABLES	XVI
LIST OF PLATES	XVII
ABBREVIATIONS	XXI
CHAPTER 1: INTRODUCTION	1
1.1 LOCATION OF STUDY AREA.....	2
1.2 SCOPE.....	2
1.3 PURPOSE OF STUDY	2
1.4 HISTORY OF LABUAN	4
1.5 GEOGRAPHY	5
1.6 POPULATION, LANGUAGE & CULTURE.....	5
1.7 PREVIOUS WORK.....	6
1.8 EXPLORATION HISTORY IN SABAH BASIN	8
CHAPTER 2: GEOLOGY	12
2.1 GENERAL GEOLOGY OF SABAH BASIN	13
2.1.1 Geological setting.....	13
2.1.2 Stratigraphy	15
2.1.3 Tectonostratigraphic Provinces.....	17
2.1.3.1 The Crocker Fold-Thrust Belt.....	18
2.1.3.2 Inboard Belt.....	18
2.1.3.3 The Outboard Belt.....	23
2.1.3.4 The Baram Delta	23
2.1.3.5 The 'Thrust Sheet'.....	24
2.1.3.6 The NW Sabah Trough	25

2.1.4 Source Rocks.....	26
2.2 GEOLOGY OF LABUAN.....	27
2.2.1 Introduction.....	27
2.2.2 Structure	27
2.2.3 Stratigraphy.....	28
2.2.3.1 Temburong Formation	28
2.2.3.2 East Kiamsam Sandstone unit.....	28
2.2.3.3 Setap Shale	32
2.2.3.4 Belait Formation	32
CHAPTER 3: PRINCIPLES OF ORGANIC MATTER EVALUATION	34
3.1 QUANTITY OF ORGANIC MATERIAL	35
3.2 TYPE OF ORGANIC MATTER	36
3.2.1 Coal Macerals.....	36
3.2.2 Oil Generation and Macerals	37
3.3 MATURATION OF ORGANIC MATTER.....	40
3.4 BIOMARKERS.....	43
3.4.1 N-alkane	44
3.4.2 Terpanes	44
3.4.3 Steranes	47
3.5 BIOMARKER PARAMETERS	51
3.5.1 N-alkane Isoprenoids Parameters.....	51
3.5.1.1 CPI Value	51
3.5.1.2 Pr/Ph Ratio	52
3.5.1.3 C ₃₁ /C ₁₇ Ratio	54
3.5.1.4 Isoprenoid/N-alkane Ratios.....	54
3.5.2 Triterpane Parameters	56
3.5.2.1 Homohopane Isomeration	56
3.5.2.2 Moretane/Hopane Ratios.....	58
3.5.2.3 Oleanane Index.....	59
3.5.2.4 Ts/Tm or Ts/ (Ts+Tm) Ratio	59
3.5.2.5 C ₂₉ /C ₃₀ Hopane	63
3.5.3 Sterane Parameters.....	63
3.5.3.1 20S/ (20S + 20R) Epimer Ratios.....	63
3.5.3.2 ββ/αα Ratios	63

CHAPTER 4: METHODS	65
4.1 FIELD WORK	66
4.2 ORGANIC PETROLOGY.....	66
4.2.1 Microscopy.....	66
4.2.2 Sample Preparations.....	68
3.2.3 Maceral Identification	68
4.2.4 Vitrinite Reflectance	69
4.3 ORGANIC GEOCHEMISTRY.....	70
4.3.1 Sample Extraction	70
4.3.2 Sample Fractionation	74
4.3.2.1 Column Chromatography.....	74
4.3.2.2 Thin Layer Chromatography (TLC).....	75
4.3.4 Sample Analysis.....	76
4.3.4.1 Gas Chromatography-Mass Spectrometry (GS-MS)	76
4.3.5 Biomarker Identification	77
CHAPTER 5: OUTCROPS AND SAMPLES	79
5.1 SEDIMENTARY SEQUENCE	80
5.2 OUTCROPS	82
5.2.1 Tg. Punei unit	82
5.2.2 Richardson Point unit.....	85
5.2.3 East Kiamsam sandstone unit	89
5.2.4 Temiang unit	89
5.2.5 Tg. Batu.....	91
5.2.6 Layang Layangan units	91
5.2.6.1 Layang Layangan units at Tg. Layang Layangan	93
5.2.6.2 Layang Layangan unit at OKK Daud.....	101
5.2.7 Tg. Kubong unit	107
5.2.8 Bethune Head unit.....	107
5.3 SAMPLES	111
CHAPTER 6: ORGANIC PETROLOGICAL AND GEOCHEMICAL RESULTS....	118
6.1 ORGANIC PETROLOGY: COAL MACERALS	119
6.1.1 Tg. Punei unit	119
6.1.2 Richardson Point unit.....	119
6.1.3 Temiang unit	121

6.1.4 East Kiamsam Sandstone	121
6.1.5 Tg. Batu unit	121
6.1.6 Layang Layangan unit I	121
6.1.7 Layang Layangan unit II	123
6.1.8 Bethune Head unit.....	124
6.2 VITRINITE REFLECTANCE	130
6.3 ORGANIC GEOCHEMISTRY: BIOMARKER DATA	133
6.3.1 Tg. Punei unit	133
6.3.2 Richardson Point unit.....	133
6.3.3 East Kiamsam Sandstone	136
6.3.4 Temiang unit	137
6.3.5 Tg Batu unit	137
6.3.6 Layang Layangan unit I	138
6.3.7 Layang Layangan unit II	138
6.3.8 Bethune Head unit.....	139
CHAPTER 7: DISCUSSION.....	150
7.1 LIPTINITE CONTENT AND MATURATION	151
7.2 EVIDENCE OF LIQUID HYDROCARBON GENERATION FROM COAL MACERALS	153
7.2.1 Occurrence of Exsudatinite and Bitumen	153
7.2.2 Occurrence of Fluorinitite	155
7.2.3 Occurrence of Micrinite	155
7.2.4 Oil Haze and Globules	156
7.2.5 Occurrence of Framboidal Pyrite.....	156
7.3 ORGANIC MATTER INPUT AND DEPOSITIONAL ENVIRONMENTS.....	160
7.3.1. Tg. Punei unit	162
7.3.2. Richardson Point unit.....	162
7.3.3 East Kiamsam sandstone and Temiang unit	164
7.3.4 Tg. Batu unit	164
7.3.5 Layang Layangan unit I	165
7.4.6 Layang Layangan unit II	165
7.4 THERMAL MATURITY	166
7.5 RELATIONSHIP BETWEEN GEOCHEMICAL PARAMETERS AND STRATIGRAPHY.....	171
7.5.1 Temburong Formation	171
7.5.2 Setap Shale	172

7.5.2.1 Richardson Point unit	173
7.5.2.2 Kiamsam Sandstone	174
7.5.2.3 Tg. Batu unit	176
7.5.3 Belait Formation	177
7.5.3.1 Layang Layangan units	177
7.5.3.2 Bethune Head unit.....	179
7.5.4 Proposed Stratigraphic Division	180
CHAPTER 8: CONCLUSIONS	183
REFERENCES.....	188
APPENDIX.....	I

List of Figures

<u>Figure</u>	<u>Page</u>
1.1 Location map of Labuan Island.....	3
2.1 Schematic NW-SE sequential cross-sections across Sabah.....	14
2.2 Stratigraphical Scheme of NW Sabah offshore.....	16
2.3. NW Borneo regional geological setting.....	19
2.4 Regional cross-section of the Sabah basin.....	20
2.5 Structural of the South Inboard Belt.....	22
2.6 Geological Map of Labuan Island.....	30
2.7 Stratigraphy of Labuan and Padas Area.....	31
3.1 Chemical structures and names for typical triterpanes.....	48
3.2 Structures of C ₂₇ – C ₃₀ steranes.....	49
3.3 Diagenetic origin of pristane and phytane.....	53
3.4 The contributions of odd-chain-length n-alkane molecules to sediments by land and marine organisms.....	55
3.5 Structures of two diastereomeric 17(H)-extended hopanes (designated 22S and 22R), which are interconverted in a reversible reaction.....	57
3.6 Scheme of diagenesis and early catagenesis of oleanane. Relationship precursor- oleanane	61
3.7 Structures of 17 α (H)-22, 29, 30-Trisnorhopane (Tm) and 18 α (H)-22, 29, 30- Trisnorneohopane (Ts).....	62
3.8 Reversible Interconversion of 20R and 20S steranes (enantiomers) and $\alpha\alpha\alpha$ and $\alpha\beta\beta$ steranes (diastereomers).	64
4.1 Scheme for Extraction and analysis geochemical fossils.....	71
4.2 Soxhlet continuous extractor for the extraction of powder of the samples.....	72
4.3 Schem for typical Gas Chromatograph/Mass.....	78
5.1. Map of Labuan Island shows locations of the outcrops.....	81
5.2 Sedimentological log of out crop of Tg. Punei unit.....	83
5.3 Sedimentological log of out cop of Richardson Point unit.....	86

5.4 Sedimentological log of Tg. Batu unit.....	92
5.5 Sedimentological log of Layang layangan units at Tg. Layang Layangan.....	94
5.6 Layang Layangan Unit I at Ladan Andy on Jalan OKK Daud.....	102
5.7 Sedimentological log of Layang layangan unit II at Tg. Kubong.....	108
5.8 Sedimentological log of outcrop of Bethune Head unit.....	109
6.1 Olot of vitrinite data.....	132
6.2 Charts show some differences between the samples studied.....	135
6.3 Normal-alkanes and isoprenoids distributions in Tg. Punei unit and East Kiamsam Sandstone.....	140
6.4 Distributions of triterpanes (m/z 191) in Tg. Punei unit and East Kiamsam Sandstone.....	141
6.5 Normal-alkanes and isoprenoids distributions in Richardson Point unit.....	142
6.6 Distributions of triterpanes (m/z 191) in Richardson Point unit	143
6.7 Normal-alkanes and isoprenoids distributions in Tg. Batu unit and Temiang unit.....	144
6.8 Distributions of triterpanes (m/z 191) in Tg. Batu unit Temiang unit.....	145
6.9 Normal-alkanes and isoprenoids distributions in Layang Layangan unit I and unit II	146
6.10 Distributions of triterpanes (m/z 191) in Layang Layangan unit I and unit II at Tg. Layang Layangan.....	147
6.11 Normal-alkanes and isoprenoids distributions in Layang Layangan unit I at JLN OKK Daud.....	148
6.12 Distributions of triterpanes (m/z 191) in Layang Layangan unit I JLN OKK Daud.....	149
7.1 Plot of Isoprenoid/normal alkane ratios.....	161
7.2 Plot of Pristane/n-C ₁₇ Vs Phytane/n C ₁₈	163
7.3 Plot C ₃₁ S/(S + R) Vs Moretane/C ₃₀ Hopane.....	167
7.4 TIC of alkane in sample Lab 41.....	175
7.5 Normal-alkanes, isoprenoids and triterpanes (m/z 191) distributions in Bethune head unit.....	181

List of Tables

<u>Table</u>	<u>Page</u>
2.1 Divisions of Labuan Sediments since Wilson (1964).....	29
3.1 Summarized of macerals in relation to kerogen type and hydrocarbon potential.....	39
3.2 Parameters of organic maturation.	42
3.3 Biomarker: Calculation and explanation of their parameters	45
5.1 Description of selected samples analysed in this study.....	113
6.1 Vitrinite reflectance data.....	132
6.2 Normal-alkanes, isoprenoids and triterpanes parameters.....	133
6.3 Identification of triterpanes in the m/z 191 mass fragmentograms.....	134
7.1 division of Labuan sediments according to geochemical parameters used in this study	182

List of Plates

<u>Plate</u>	<u>Page</u>
4.1 Leitz DMRXP photometry microscope.....	67
4.2 Buchi evaporation.....	73
Plate 5.1 Gray siltstone with trace fossils and rounded coal pebbles in Tg. Punei unit.....	84
5.2 Graded bedded of conglomerate to fine sandstone with lens of coal in Tg. Punei unit SW of the Island.....	84
5.3 Massive gray mudstone in Richardson point unit SW Labuan Island.....	87
5.4 Argillaceous unit showing steeply dipping beds of shale, siltstone and fine sandstone with carbonaceous material in Richardson point unit.....	87
5.5 Fold within Richardson Point unit at the SW of Labuan Island.....	88
5.6 Steeply dipping beds of shales, siltstones and fine to medium sandstone near to the Jalan Ranchor Ranchor.....	88
5.7 Grey siltstone, showing laminations of organic matter and micro-Faults in East Kiamsam Sandstone unit at Tg. Kiamsam	90
5.8 Massive gray shale with thin sandstone beds in Temaing unit at Jalan Lubok Temiaing	90
5.9 Channelized sandstone beds with parallel laminations of carbonaceous materials in Layang Layangan Unit I at Tg. Layang Layangan.....	98
5.10 Slumped sandstone beds with carbonaceous material and coal pebbles in Layang Layangan unit I at Tg. Layang Layangan	98
5.11 Steeply dipping sandstone with ripple marks in Layang Layangan unit I at Tg. Layang Layangan.....	99
5.12 Faults in Layang Layangan unit I at Tg. Layang Layangan.....	99
Plate 5.13 Conglomeratic sandstone of Layang Layangan Unit II at Tg. Layang Layangan showing channel features with erosive bases.....	100
5.14 Cross bedded conglomeratic sandstone with rounded coal pebbles in Layang Layangan unit II at the top of the Tg. Layang Layangan exposure	100
5.15 Argillaceous sequence of Layang Layangan Unit I at Ladan Andy on Jalan OKK Daud.....	105

5.16 Intercalations of shale, siltstone and sandstone. Layang Layangan unit I at Ladan Andy on Jalan OKK Daud.....	105
5.17 Channelized sandstone within argillaceous beds in Layang Layangan unit I at Ladan Andy on Jalan OKK Daud.....	106
5.18 Cross bedded coarse sandstone with coal on surfaces of cross beds underlain by fine to medium ripple marked sandstone in Layang Layangan unit I at Ladan Andy on Jalan OKK Daud.....	106
5.19 Trough bedded coarse sandstone with large lenses of coal, Layang Layangan unit II at north of the Island at Tg. Kubong.....	110
5.20 Bioturbated shale and siltstone with vertical burrow in the Bethune Head unit north of Labuan Island.....	110
5.21 Hand specimen of sample Lab 21 of coal.....	114
5.22 Hand specimen of sample Lab 22.....	114
5.23 Hand specimen of sample Lab 20	114
5.24 Hand specimen of sample Lab 18	114
5.25 Hand specimen of sample Lab 19	114
5.26 Hand specimen of sample Lab 41	114
5.27 Hand specimen of sample Lab 23	115
5.28 Hand specimen of sample Lab 24.....	115
5.29 Hand specimen of sample Lab 25.....	115
5.30 Hand specimen of sample Lab 26	115
5.31 Hand specimen of sample Lab 7	116
5.32 Hand specimen of Lab 4.....	116
5.33 Hand specimen of sample Lab 33.....	116
5.34 Hand specimen of sample Lab 36	116
5.35 Hand specimen of sample Lab 37.....	116
5.36 Hand specimen of sample Lab 1	117
5.37 Hand specimen of sample Lab 10	117
5.38 Hand specimen of sample Lab 12	117

5.39 Hand specimen of sample Lab 17.....	117
6.1 (a) Sample 21 under reflected light; field width 0.21mm (b) Same view as 6.1a under blue light excitation.....	120
6.2 (a) Sample 21 under reflected light; field width 0.21mm (b) Same view as (a) under blue light excitation.....	120
6.3 (a) Sample 18 under reflected light; field width 0.21mm (b) Same view as (a) under blue light excitation.....	122
6.4 (a) Sample 23 under reflected light; field width 0.21mm (b) Same view as (a) under blue light excitation.....	122
6.5 (a) (Sample 7 under reflected light; field width 0.21mm (b) Same view as (a) under blue light excitation.....	125
6.6 (a) Sample 37 under reflected light; field width 0.21mm (b) Same view as (a) under blue light excitation.....	125
6.7 (a) Sample 5 under (reflected light; field width 0.21mm (b) Same view as (a) under blue light excitation.....	126
6.8 (a) Sample 4 under reflected light; field width 0.21mm (b) Same view as (a) under blue light excitation.....	126
6.9 (a) Sample 36 under reflected light; field width 0.21mm (b) Same view as 6.1a under blue light excitation.....	127
6.10 (a) Sample 7 under reflected light; field width 0.21mm (b) Same view as (a) under blue light excitation.....	127
6.11 (a) Sample 2 under reflected light; field width 0.21mm (b) Same view as (a) under blue light excitation.....	128
6.12 (a) Sample 10 under reflected light; field width 0.21mm (b) Same view as (a) under blue light excitation.....	128
6.13 (a) Sample 2 under reflected light; field width 0.21mm (b) Same view as (a) under blue light excitation.....	129
6.14 (a) Sample 10 under reflected light; field width 0.21mm) (b) Same view as (a) under blue light excitation.....	129
7.1 Exsudatinitite is exuding from bituminite (under reflected light (top) and bottom: under blue light excitation (bottom), field width 0.21mm). Sample: Lab 39.....	154
7.2 Oil haze from structured liptinite macerals in sample Lab 4 (under normal light (top) and under blue light excitation (bottom), field width 0.21mm).....	157

7.3 Framboidal pyrite associated with a considerable liquid hydrocarbon (under normal light (top) bottom: under blue light Excitation (bottom), field width 0.21mm). Sample Lab 2 from Layang layangan unit II	158
7.4 Elongated pyrite (the white bodies in the above image) associated with liptinitic macerals and hydrocarbon generated in the form of globules (under reflected light (top) and under blue light excitation (bottom), field width 0.21mm)	155

Abbreviations

CPI	Hydrocarbon Preference Index
cm	Centimeter
EOM	Extracted Organic matter
g	Gram
GC	Gas Chromatogram
H	Hydrogen
Km	Kilometer
Ro	Mean vitrinite reflectance
mg	Milligram
ml	Milliliter
mm	Millimeter
m/z	Mass to charge ratio of an ion in mass spectrometry
NSO	Nitrogen, Sulphur, and Oxygen-containing compounds
n-C _x	Normal alkane C _x
Ph	Phytane
Pr	Pristane
Tg.	Tanjung
TIC	Total Ion Current
