

List of Tables

Table 2.1	Summary of types of catalysts employed in some of the past works and their best observed operating conditions	30
Table 3.1	List of chemicals and materials	44
Table 3.2	Experimental Matrix	62
Table 3.3	Table of factors to be optimized using D-Optimal design	63
Table 3.4	Experimental design and response based on experimental runs proposed by D-optimal design	65
Table RDO- 1	Evaluated kinetic parameter of the HDO of oleic acid using Ni/Al ₂ O ₃ and NiOx/Al ₂ O ₃	70
Table 4.1	Elemental composition and textural properties of Al ₂ O ₃ , Ni/Al ₂ O ₃ and NiOx/Al ₂ O ₃	81
Table 4.2	Textural properties of Al ₂ O ₃ , Ni/Al ₂ O ₃ and NiOx/Al ₂ O ₃ samples	84
Table 4.2	Evaluated kinetic parameter of the HDO of oleic acid using Ni/Al ₂ O ₃ and NiOx/Al ₂ O ₃	99
Table 4.3	Evaluated Arrhenius parameter of the HDO of oleic acid using Ni/Al ₂ O ₃ and NiOx/Al ₂ O ₃	100
Table 4.4	Elemental composition of Zeol and NiMoFOx/Zeol samples	105
Table 4.5	Textural properties of Zeol and NiMoFOx/Zeol samples	114
Table 4.6	Elemental composition of Zeol and Zeol supported catalysts	125
Table 4.7	Textural properties of Zeol and PdOx/Zeol samples	127
Table 4.8	Elemental composition of Al ₂ O ₃ and NiOx/Al ₂ O ₃	145
Table 4.9	Textural properties of Al ₂ O ₃ and NiOx/Al ₂ O ₃	146
Table 4.10	Elemental composition of Zeol and FPdOx/Zeol samples	159

Table 4.11	Elemental composition and textural properties of Zeol and FPdOx/Zeol samples	161
Table 4.12	Elemental composition of Zeol and FMoOx/Zeol samples	176
Table 4.13	Textural properties of Zeol and FMoOx/Zeol samples	179
Table 4.14	Evaluated rate constants for the hydrodeoxygenation of oleic acid	194
Table 4.15	Elemental composition of Zeol and FPtOx/Zeol samples	199
Table 4.16	Textural properties of Zeol and FPtOx/Zeol samples	203
Table 4.17	Range of selected independent variables	209
Table 4.18	Experimental design and response based on experimental runs proposed by D-optimal design	209
Table 4.19	ANOVA test for the response model Y (Hydrodeoxygenation process) and Z (Isomerization process)	211
Table 4.20	Degree of correlation for model validation	212
Table 4.21	Elemental composition of Zeol and Zeol supported catalysts	225
Table 4.22	Catalyst precursor unit cost	228
