

**EFFECT OF LEECH THERAPY ON BODY COMPOSITION
PARAMETERS**

NAZIHAH BINTI AHMAD

**RESEARCH REPORT SUBMITTED
IN PARTIAL FULFILMENT OF THE REQUIREMENT FOR THE
DEGREE OF MASTER OF ENGINEERING (BIOMEDICAL)**

2012

ABSTRACT

Leech therapy treatment is one of the complimentary and alternative medicine that has been categorized as one of the ancient method in treating diseases. Locally unpopular this treatment still has its own believer that practices it for the sake of bloodletting treatment that claims to be successful. Therefore, a series of study should be conducted in order to prove the aforementioned claim by using the bioimpedance analysis. Bioimpedance analysis is way of measuring the fat and fat free mass in much more convenience way. This measurement is normally used by nutritionist as this invasive method is very suitable to determine the health of a person which directly affected by the composition of the fat in the body that can be further subdivide into water, mineral and protein constituents. The result could be used to measure the effectiveness of the leech therapy treatment as the readings and changes are taken into consideration before and after the treatment. Thus, using engineering tools to analyze the result can prove the effect of this therapy quantitatively.

ABSTRAK

Rawatan terapi lintah adalah salah satu kaedah perubatan sampingan dan alternatif yang telah dikategorikan sebagai salah satu kaedah kuno dalam merawat pelbagai penyakit. Secara am, walaupun rawatan ini kurang popular di kalangan penduduk tempatan ianya masih dipelopori oleh segilintir pengamal perubatan lintah yang percaya bahawa perubatan terapi lintah adalah cara yang berkesan dalam bidang perawatan. Oleh itu, beberapa siri kajian perlu dijalankan untuk membuktikan tuntutan yang dinyatakan di atas dengan menggunakan analisis bioimpedance. 'Analisis Bioimpedance' adalah cara mengukur jisim bebas lemak dan lemak dengan cara yang lebih mudah. Penggunaan cara ini biasanya digunakan oleh pakar pemakanan sebagai salah satu kaedah invasif yang sangat sesuai dalam menentukan kesihatan seseorang yang mempunyai kesan secara langsung dengan komposisi lemak dalam badan dan boleh dihuraikan lagi dalam pembahagian komposisi badan dari segi kandungan air dalam badan, mineral dan protein. Hasilnya boleh digunakan untuk mengukur keberkesanan rawatan terapi lintah melalui bacaan dan perubahan yang diambil kira sebelum dan selepas rawatan lintah. Oleh itu, menggunakan alat-alat kejuruteraan untuk menganalisis hasilnya dapat membuktikan kesan terapi ini secara kuantitatif.

UNIVERSITI MALAYA
ORIGINAL LITERARY WORK DECLARATION

Name of Candidate: **NAZIHAH AHMAD**

Registration/Matric No: **KGL 100004**

Name of Degree: **Master of Engineering (Biomedical)**

Title of Project Paper/Research Report/Dissertation/Thesis (“this Work”):

EFFECT OF LEECH THERAPY ON BODY COMPOSITION PARAMETERS

Field of Study: **HEALTH AND BIOIMPEDANCE**

I do solemnly and sincerely declare that:

- (1) I am the sole author/writer of this Work;
- (2) This Work is original;
- (3) Any use of any work in which copyright exists was done by way of fair dealing and for permitted purposes and any excerpt or extract from, or reference to or reproduction of any copyright work has been disclosed expressly and sufficiently and the title of the Work and its authorship have been acknowledged in this Work;
- (4) I do not have any actual knowledge nor do I ought reasonably to know that the making of this work constitutes an infringement of any copyright work;
- (5) I hereby assign all and every rights in the copyright to this Work to the University of Malaya (“UM”), who henceforth shall be owner of the copyright in this Work and that any reproduction or use in any form or by any means whatsoever is prohibited without the written consent of UM having been first had and obtained;
- (6) I am fully aware that if in the course of making this Work I have infringed any copyright whether intentionally or otherwise, I may be subject to legal action or any other action as may be determined by UM.

ACKNOWLEDGEMENTS

In the name of Allah the most gracious and merciful, I would like to say thank you god for his love and blessing to me in order to complete this project.

First and foremost, I would want to express the appreciation towards my supervisor Assoc. Prof. Dr. Wan Mohd Azhar for his time and guidance through the time period of this project execution. Also, most gratitude to those who have been directly and indirectly involve in helping out the study process from the start to the end.

Not to forget a big thank you to family and friends who always been there to support all along these period continuously.

Nazihah Ahmad

LIST OF FIGURES.....	x
LIST OF TABLES.....	xi

Chapter 1: Introduction

1.1 Background	1
1.2 Research problem and problem statement	2
1.3 Objectives	2
1.4 Hypothesis	2
1.5 Scope of the Study	2
1.6 Significance of the study.....	2

Chapter 2: Literature Review

2.0 Modern Medicine vs. Complementary and Alternative Medicine (CAM)	3
2.1 Modern medicine	
2.1.1 Surgery	4
2.1.2 Pill/ tablets/ capsules	4
2.1.3 Medicine tools	5
2.2 CAM	
2.2.1 Diets and supplements.....	5
2.2.2 Botanicals products.....	6

2.2.3 Unconventional agents.....	6
2.2.4 Traditional medicine	7
2.2.5 Energy healing	9
2.3 Leeching/ hirudotherapy in ancient time	
2.3.1 Leeches	9
2.3.2 Mechanism of Hirudotherapy	11
2.3.2.1: Application in Soft Tissue Hematomas	12
2.3.2.2: Application in Tissue Flap Reconstructions	12
2.3.2.3: Application in the Setting of Severe Soft Tissue Injury and Surgical Replantation	13
2.4 Body composition	
2.4.1 Body composition models	16
2.4.1.1 Two component model	16
2.4.1.2 Three component model	17
2.4.1.3 Four component model	17
2.4.1.4 Six component model	17
2.4.2 Body composition measurement	
2.4.2.1 Hydrodensitometry	18
2.4.2.2. Anthropometry	19
2.4.2.3 Bioelectrical Impedance	19
2.4.2.4 Air displacement Plethysmography (ADP)	20
2.4.2.5 Hydrometry	21
2.4.2.6 Dual energy X-ray absorptiometry (DXA)	21
2.4.2.7 Neutron activation analysis (NAA)	21
2.4.2.8 Whole body counting of potassium	22
2.4.2.9 Computed tomography	22

2.4.2.10 Magnetic resonance imaging (MRI)	23
2.5 Bioelectrical impedance analysis (BIA)	
2.5.1 BIA principles	23
2.5.1.1 Body impedance (Z)	24
2.5.1.2 Volume and body composition	24
2.5.1.3 Calculation of body composition	25
2.5.2 BIA models and approaches	26
2.5.2.1 Single frequency BIA (SF-BIA).....	26
2.5.2.1.1 Series model.....	26
2.5.2.1.2 Parallel model	26
2.5.2.2 Multi-frequency BIA (MF-BIA)	27
2.5.2.2.1 Bioelectrical impedance spectroscopy (BIS).27	
2.5.2.2.2 Segmental model	27
2.5.2.2.3 Localized bioelectrical impedance analysis .28	
2.5.2.2.4 Bioelectrical impedance vector analysis (BIVA)	
.....	28
2.6 Statistical test	
2.6.1 T-test	29
2.6.1.1 Independent t-test	29
2.6.1.2 Dependent t-test	29
2.6.1.3 One sample t-test	30
2.6.2 ANOVA	30
2.6.2.1 One way ANOVA	30
2.6.2.2. Two-way ANOVA	30
Chapter 3: Methodology	
3.0 Introduction	31

3.1 Subjects / patient	32
3.2 Measurement setup	32
3.3 Data measurement	33
3.4 Statistical analysis	
3.4.1 Bar graph	34
3.4.2 Descriptive statistics	34
