CHAPTER 1 AN INTRODUCTION TO THE GEOLOGY OF BORNEO ISLAND	1
1.1 GEOMORPHOLOGY	1
1.2 PREVIOUS GEOLOGICAL STUDIES	2
1.2.1 History of geological studies in Borneo	2
1.2.1 Systematic geological mapping in Borneo	2
1.3 BRIEF DESCRIPTION OF THE GEOLOGY OF BORNEO ISLAND	6
1.4 A REVISED STRATIGRAPHIC CLASSIFICATION FOR BORNEO ISLAND	10
1.5 GEOLOGY OF THE SEAS SURROUNDING BORNEO ISLAND	11
1.5.1 Sundaland	11
1.5.2 Makassar Strait	13
1.5.3 Celebes Sea	14
1.5.4 Sulu Sea	19
1.5.5 South China Sea	27
CHAPTER 2 THE BASEMENT OF BORNEO	33
2.1 "CONTINENTAL" BASEMENT & THE SUNDA SHIELD	33
2.2 DEVONIAN	34
2.3 PRE-CARBONIFEROUS BASEMENT - NW KALIMANTAN	40
2.4 PRE-CARBONIFEROUS BASEMENT - W SARAWAK	46
CHAPTER 3 LATE PALEOZOIC SHELF SEDIMENTS & METAMORPHIC COMPLEXES	55
3.1 ?CARBONIFEROUS-PERMIAN METASEDIMENTS	55
3.2 PERMO-TRIASSIC IGNEOUS & METAMORPHIC ROCKS	57
CHAPTER 4 MESOZOIC SHELF & SHELF MARGIN SEDIMENTS & ASSOCIATED IGNEOUS ROCKS	60
4.1 UPPER TRIASSIC TO LOWER CRETACEOUS SHELF SEDIMENTS	60
4.2 UPPER TRIASSIC VOLCANIC ROCKS	64
4.3 UPPER TRIASSIC - LOWER JURASSIC VOLCANICS & INTRUSIVES	66
4.4 JURASSIC-CRETACEOUS SHELF SEDIMENTS	68

4.5 CRETACEOUS SHELF MARGIN SEDIMENTS & ASSOCIATED VOLCANICS	71
4.5.1 NW Kalimantan	71
4.5.2 Meratus Mountains	73
CHAPTER 5 CRETACEOUS VOLCANO-PLUTONIC ROCKS	77
5.1 SCHWANER MOUNTAINS	77
5.1.1 Introduction	77
5.1.2 Lower Cretaceous granitoids (K11)	77
5.1.3 Lower Cretaceous volcanics (K12)	81
5.1.4 Upper Cretaceous volcanics (Ku2)	81
5.1.5 Upper Cretaceous granitoids (Ku1)	82
5.2 WEST SARAWAK	83
5.2.1 Upper Cretaceous granitoids	83
5.3 PRESENT DAY HEAT FLOW	89
5.4 MERATUS MOUNTAINS	90
5.4.1 Lower Cretaceous volcanics	90
5.4.2 Upper Cretaceous volcanics	90
5.4.3 Upper Cretaceous granitoids	91
CHAPTER 6 OCEANIC CRUSTAL ROCKS & OVERLYING SEDIMENTS INCLUDING TURBIDITE BASINS	96
6.1 INTRODUCTION	96
6.2 OPHIOLITES IN CENTRAL AND NW KALIMANTAN & WEST SARAWAK	98
6.3 OPHIOLITES IN THE MERATUS MOUNTAINS AREA	103
6.4 OPHIOLITES IN SABAH	108
6.5 LOWER CRETACEOUS TURBIDITE BASINS	113
6.5.1 SE Borneo	113
6.5.2 Sabah	118
6.6 UPPER CRETACEOUS PALEOCENE TURBIDITE BASINS	119
6.6.1 NW & Central Kalimantan	119
6.6.2 Sarawak	122
6.6.3 Sabah	126
CHAPTER 7 OPHIOLITE, MÉLANGE & SUTURES - DEFORMATION OF OCEANIC CRUST	138
7.1 "ALPINE-TYPE" OPHIOLITES & MÉLANGE IN BORNEO	138
7.2 OPHIOLITE IN CENTRAL & WEST KALIMANTAN & WEST SARAWAK	139

7.3	OPHIOLITE IN THE MERATUS MOUNTAINS, SE BORNEO	150
7.4	OPHIOLITE IN EASTERN SABAH	152
7.5	OPHIOLITE IN KUDAT PENINSULA & BANGGI ISLAND	155
7.6	CENOZOIC MÉLANGE IN EASTERN SABAH	157
7.7	GENERAL REMARKS	160
CHAPTER 8	THE PALEOGENE LAND SURFACE & ITS SUBSEQUENT RIFTING	161
8.1	THE PALEOGENE LAND SURFACE IN SUNDALAND	161
8.2	THE PALEOGENE LAND SURFACE IN BORNEO	162
8.3	SUMMARY OF EARLY CENOZOIC TECTONICS IN BORNEO	171
8.4	ORIGIN OF PALEOGENE RIFTING & DEVELOPMENT OF CENOZOIC BASINS	173
CHAPTER 9	CENOZOIC SEDIMENTARY BASINS	176
9.1	INTRODUCTION	176
9.2	WEST SARAWAK, NW & C KALIMANTAN	180
	9.2.1 Paleogene Basins - W Sarawak	180
	9.2.2 Paleogene Basins - W & C Kalimantan	182
	9.2.3 Neogene Basins - W Sarawak & Kalimantan	188
9.3	CENTRAL & N SARAWAK & BRUNEI DARUSALAAM	190
	9.3.1 Paleocene-middle Eocene turbidite basins in Central Sarawak	190
	9.3.2 Post-upper Eocene basins - N Sarawak & Brunei	192
9.4	CENTRAL & E SABAH	211
9.5	NORTHERN SABAH	216
9.6	OFFSHORE N & NE SABAH	217
9.7	OFFSHORE NORTHWEST BORNEO	219
	9.7.1 NW Sabah	219
	9.7.2 Baram Delta Province	228
	9.7.3 Sarawak shelf & offshore Brunei	237
	9.7.4 Balingian Province	249
	9.7.5 Central Luconia Province	249

9.8 EAST & SOUTHEAST KALIMANTAN	252
9.8.1 The Kutei Basin	252
9.8.2 Makassar Strait	263
9.8.3 The Barito, Pasir & Asem Asem Basins	263
9.8.4 The Paternoster Platform	268
9.9 NORTHERN KALIMATAN	272
9.9.1 Mangkalihat Peninsula	272
9.9.2 Tarakan and Berau	274
9.10 SOUTH SULAWESI	279
9.11 THE JAVA SEA	279
9.12 OVERALL STRATIGRAPHIC FRAMEWORK FOR CENOZOIC HYDROCARBON BASINS IN THE BORNEO REGION	281
9.13 ORIGIN OF BASIN FORMATION & SUBSEQUENT BASIN INVERSION	282
 CHAPTER 10 CENOZOIC IGNEOUS ROCKS	289
10.1 EOCENE VOLCANIC ROCKS - W KALIMANTAN & SARAWAK	289
10.2 OLIGOCENE - MIDDLE MIOCENE INTRUSIVE ROCKS - W KALIMANTAN & W SARAWAK	292
10.3 UPPER MIOCENE - PLIOCENE VOLCANIC ROCKS IN W KALIMANTAN & SARAWAK	294
10.4 UPPER MIOCENE GRANODIORITES OF GUNONG KINABALU TYPE	298
10.5 MIOCENE VOLCANIC ARC, EASTERN SABAH	300
 CHAPTER 11 QUATERNARY GEOLOGY	307
11.1 INTRODUCTION	307
11.2 QUATERNARY TERRACES	308
11.3 PLEISTOCENE GLACIATION	310
11.4 EROSION CYCLES	310
11.5 QUATERNARY EROSION LEVELS & CRUSTAL MOVEMENTS	311
11.6 CONCLUSIONS	315
 CHAPTER 12 GEOPHYSICAL STUDIES & VERTICAL TECTONICS IN BORNEO	319
12.1 THE USE OF GEOPHYSICS IN BORNEO	319
12.2 MAGNETIC LINEATIONS	320
12.3 PALEOMAGNETISM	329

12.4 GRAVITY	331
12.4.1 Regional gravity studies	331
12.4.2 Gravity studies in Central & NW Kalimantan	335
12.4.3 Gravity studies in Sarawak	336
12.4.4 Gravity studies in Sabah	337
12.5 VERTICAL TECTONICS IN BORNEO	338
12.5.1 SE Borneo - Meratus Mountains	338
12.5.2 Eastern Sabah	338
12.5.3 NW Borneo	339
12.5.4 Conclusion	340
 CHAPTER 13 CONCLUSIONS	 342
13.1 CORRELATION OF PALEOZOIC & MESOZOIC STRATIGRAPHY OF BORNEO WITH SE ASIA	342
13.1.1 Introduction	
13.1.2 Stratigraphic correlation between Borneo & China & Indochina	343
13.1.3 Stratigraphic correlation between Borneo & the western part of Sundaland	344
13.1.4 Stratigraphic correlation between Borneo & the southern part of Sundaland	345
13.2 THE DANAU SEA, CRETACEOUS SUBDUCTION & ACCRETION TO SOUTHEAST SUNDALAND	346
13.3 THE INDIA-EURASIA COLLISION & THE RIFTING & DEVELOPMENT OF CENOZOIC SEDIMENTARY BASINS IN BORNEO	352
13.4 AN OVERALL STRUCTURAL FRAMEWORK FOR BORNEO ISLAND	356
13.4.1 The Anambas orocline and its counterpart in Borneo	356
13.4.2 Major tectonic lineaments in Borneo	357
13.5 WHAT LIES BENEATH BORNEO ISLAND?	358

LIST OF FIGURES

	page
CHAPTER 1	
1.1 The geology of Borneo Island according to Hamilton (1979).	9
1.2 Position of Borneo Island within the submarine physiographic features of SE Asia	12
1.3 Location of ODP drill sites, Celebes & Sulu Seas	15
1.4 Logs of drill cores, Sulu & Celebes Seas	18
1.5 Geological elements of the Sulu Sea	22
1.6a,b Seismic profiles - Dangerous Grounds, South China Sea	23,24
1.7 Seismic profile SE Sulu Sea to to Zamboanga	26
1.8 Bathymetry of the South China Sea	28
CHAPTER 2	
2.1 Sketch map showing locality of Devonian limestone, Sg.Telen, Kalimantan.	35
2.2 Photograph showing exposure in Tuang Formation, Kim Hin Brickworks, SE of Kuching, Sarawak	49
CHAPTER 3	
3.1 Distribution of Carbo-Permian metasedimentary rocks and Permo-Triassic igneous and metamorphic Complexes in Kalimantan and W Sarawak	56
CHAPTER 4	
4.1 Distribution of Triassic and Triassic-Jurassic sediments and associated igneous rocks, W Kalimantan & W Sarawak.	61

	page
4.2 Distribution of Pedawan/Selangkai Formations across central Borneo	69

CHAPTER 5

5.1 Distribution of Pinoh Metamorphics & Cretaceous granitoids & associated volcanics, Schwaner Mountains, C & W Kalimantan	78
5.2 Distribution of Pinoh Metamorphics, Cretaceous granitoids & associated volcanic rocks, NW Kalimantan & W. Sarawak	80
5.3 Location of Upper Cretaceous granitic intrusions in W Sarawak	84
5.4 a,b Microphotographs of cordierite adamellite, Pueh, W Sarawak	85
5.5 a,b Microphotographs of biotite-garnet intergrowths, Pueh Adamellite, W Sarawak	86
5.6 Distribution of Cretaceous granitoids & associated volcanics, Meratus Mountains area, S E Borneo	92

CHAPTER 6

6.1 Distribution of ophiolites, Central Borneo & NW Kalimantan	99
6.2 Distribution of Lower Cretaceous ultrabasic rocks, turbiditic sediments (Alino Group), Paleogene limestones and fluvial deposits, SE Borneo	104
6.3 Sketch map of the general geology of Central & NW Borneo showing Cretaceous - Eocene flysch basins of the Rajang Group and its equivalents, Cenozoic rift basins and Eocene volcanism	121

	page
6.4 Sketch map showing location and geology of the Balingian Shear Zone	125
6.5(a) Highly deformed metasediments, Balingian Shear Zone	127
6.5(b) Vertically dipping arenaceous turbidites: sheared with the development of graphitic layers between more competent beds. Balingian Shear Zone	
6.6 (a) Fold outlined by sedimentary banding, Balingian Shear Zone	128
6.6 (b) Folded quartz veining in phyllites, Balingian Shear Zone	
6.7 (a) Quartzite horizons stretched into boudins and rotated into the plane of maximum shear	129
(b) Tight Z-shaped fold and later quartz-filled tension joints. Balingian Shear Zone	
6.8 Bouguer gravity map, Tatau horst area and offshore Balingian basin	130
6.9 Stereographic projection on lower hemisphere, equal area net, of structural measurements in the Balingian Shear Zone	131
CHAPTER 7	
7.1 Distribution of mélange in Sabah	153
CHAPTER 8	
8.1 The Paleocene landmass of SE Sundaland and rift zones	163
8.2 Stratigraphic sections of Cenozoic basins of the South China Sea area.	164
8.3 Stratigraphic sections of Cenozoic basins S of the Rajang Group in Borneo	167

	page
8.4 Paleogene grabens and lithostratigraphy of the Barito Basin, S.E. Kalimantan	169
8.5 Diagrammatic cross sections from the Barito Basin through the Meratus Mountains to the Pasir and Asem Asem Basins.	172
8.6 Eocene rift basins and areas of Eocene outcrop in Java & Kalimantan	175
CHAPTER 9	
9.1 The principal Cenozoic sedimentary basins of Borneo Island and surrounding offshore areas	178
9.2 Correlation chart for early Cenozoic stratigraphy in W & C Kalimantan	181
9.3 Early Cenozoic basins of Central and NW Kalimantan	184
9.4 Paleofacies of central Luconia, Balingian & Baram Delta Provinces	193
9.5 Oligocene deltas prograding towards the NE and terminating at the onshore trace of the West Baram Line which transects Borneo	198
9.6 Distribution of Oligocene sediments in N Sarawak, Brunei and SW Sabah	200
9.7 Distribution of paleo-environments in Temburong District, East Brunei	201
9.8 Deformed and slumped flaser bedded silts, Temburong Formation, E Brunei	202
9.9 Deformed burrows in siltstone, Temburong Formation, E Brunei	203

	page
9.10 Contoured stereographic plots of structural measurements in the Temburong Formation, Temburong District, E Brunei	204
9.11 Distribution of lithostratigraphic units in Brunei	209
9.12 Stratigraphy of offshore NW Sabah and eustatic curves	220
9.13 NW Borneo regional geology	221
9.14 Tectonic-stratigraphic Provinces of northern Borneo (colour)	222
9.14 Tectonic-stratigraphic Provinces of northern Borneo (monochrome)	223
9.15 Imbrication in the Fold-Thrust Belt, Offshore NW Sabah	225
9.16 Clay diapirism in the Outboard Belt, Offshore NW Sabah	227
9.17 Delta topset sequences in the Nosong area, offshore NW Sabah	229
9.18 Distal part of toe thrust zone, Baram Delta, offshore NW Sabah	230
9.19 Lower Cenozoic Thrust Sheet , 50 Km N of Kota Kinabalu, NW Sabah	232
9.20 SE extremity of the Cenozoic Thrust Sheet, offshore NW Sabah	235
9.21 Geological provinces offshore Sarawak and Brunei	238
9.22 Location of offshore oil and gas fields, Brunei	245

	page
9.23 Principal Cenozoic basins of Kalimantan	253
9.24 Stratigraphic chart for the Teweh and Upper Mahakam (W Kutei) basin	254
9.25 Distribution of Oligo-Miocene and Mio-Pliocene limestones in Indonesia	255
9.26 Location of principal oil & gas fields and sedimentary basins, E Kalimantan	258
9.27 Stratigraphic chart showing main reservoir units in offshore (lower) Kutei basin	260
9.28 Successive positions of shelf breaks in the Kutei delta from seismic profiles	262
9.29 Delta front positions in the Kutei basin from foraminiferal zones	262
9.30 Diagrammatic section across the Makassar Strait in the region of the Paternoster Platform	264
9.31 Stratigraphy of the Tanjung and Pasir basins on either side of the Meratus Mountains	266
9.32 Distribution of Paleogene fluviatile sediments and limestones in SE Borneo	271
9.33 Stratigraphic chart & diagrammatic cross section for E Kalimantan	273
9.34 Growth faulting and reef anomalies on crests of tilted blocks, Sankurilang Bay, S of Mangkalihat Peninsula, E Kalimantan	275
9.35 Eocene paleo-environments and rock units in Kalimantan	276
9.36 Distribution of Lower and Middle Miocene paleo-environments in E Kalimantan	276

	page
9.37 Tarakan basin oilfields and faults structures	278
9.38 Structure map of the Java Sea between Kalimantan and Java	280
9.39 Correlation diagram showing relationship between deformation and tectonic events in the SE Asian region	288
CHAPTER 10	
10.1 Pliocene flood basalts, Central Borneo	295
10.2 Western margins of early Middle Miocene Sulu Sea rift zone, Dent Peninsula, E Sabah	301
10.3 Diagrammatic cross section of the Sulu Sea marginal basin & early Middle Miocene volcanicity in the Semporna Peninsula, SE Sabah	302
10.4 Geological map of the Sandakan area showing recently discovered andesitic tuffs and location of volcanic neck	305
CHAPTER 11	
11.1 Quaternary erosion levels in NW Borneo	312
11.2 Pliocene erosion surface in Sabah	314
11.3 Regional tilt in Sarawak, Brunei and Sabah	317
11.4 Drainage and hypsography in the Meratus Mountains area, SE Borneo	319
CHAPTER 12	
12.1 Magnetic lineations, South China Sea	321
12.2 Two contrasting models for the opening of the South China Sea	323

12.3	Reconstruction of sea floor spreading and opening of the South China Sea	page 325
12.4	Selected free-air gravity anomalies in SE Asia	332
12.5	Free air gravity anomaly map of the South China Sea offshore NW Borneo	333
12.6	NW-SE seismic section across the NW Borneo Trough showing free-air and magnetic anomalies	334
CHAPTER 13		
13.1	Major fault patterns in SE Asia	354

APPENDICES

APPENDIX A Stratigraphic units for the geology of Borneo

APPENDIX B Stratigraphic correlation chart for W and C
Kalimantan and W Sarawak (after Williams et al., 1988)
