Bank Loan Products

Short Term Loans

Short term loans are granted for a period of one to three years subject to a fixed repayment arrangement. The monthly installments are usually on monthly basis. Most of these loans are for financing increase in inventory for seasonal borrowers. A letter of agreement may be used to specify the line amount. Line of credit borrowings are secured with inventories, accounts receivable or fixed assets.

Long Term Loans

Long Term Loans are loans with maturity period exceeding three years. Often they finance the purchase of fixed assets or the broad expansion of production capacity, but they may also be made to finance a change in a company control or an acquisition or to take out a revolving credit loan. The repayment source for long term loans must consist of stable, long-term sources of cash flow. The borrower's fixed assets, including a mortgage on land and structures or a perfected security interest on equipment normally secure the term bank loan.

Overdraft

Overdraft is a credit line extended to the borrower with the condition repayable on demand.

Trade Bills

Trade Bills extended to the borrowers are usually Trust Receipts, Letter of Credit, Bankers Acceptance, Bank Guarantee and Shipping Guarantee.

Loan Packages

Banks often package their loan products to meet their customers needs. Three of the common loan packages offered by commercial banks are Bridging Loans, Revolving Credit Loans and Contract Financing. All the three packages mentioned are short-term in nature and are granted to meet specific needs of the borrower.

Bridging Loans

Bridging Loan is project-type loan that bridges a period of time up to a specific event that generates sufficient funds for repayment of the loan. Bridging Loan is granted subject to repayable on demand or via redemption sums received from the project. Bridging loan is usually granted to building developers to finance the completion of a specific project. This type of loans is usually secured by the asset itself, which is being financed by the bank.

Revolving Credit Loans

Revolving Credit Loans finance the expansion of current assets or the retirement of current liabilities. This type of credit often is called assetbased lending because the amount borrowed are tied to a borrowing base formula that limits the outstanding amount to a margin percentage on the borrower's receivable, inventory or in extractive industries, reserves owned. Repayment for these loans is derived from collections from the borrower's customers. Normally, revolving credit advances are made against a borrowing base of eligible receivable and inventories. Of the two, receivable constitute better collateral, whereas inventories must be viewed on a highly discounted liquidation basis.

Contract Financing

Contract Financing is granted to finance the completion of a specific project for a period of time up to a specific event that generates sufficient funds for repayment of the loan. As the contractor receives part payment for completion of the project under construction, he is to repay the bank loan as stipulated in the terms of repayment. This type of loan is usually secured by a Bank Guarantee.

Notes

- Years of good conduct PBB/other Banks is defined as the last 12 months records without default such as:-5 /> rep or return cheques/claims on BG/SG/SBLC/Frequent OD excess/Habitual overdue Bills (>14 days) or instalments (>30 days).Other Banks conduct must be supported by last 6 months documentary evidence.
 - To score zero for each financial factors if unable to furnish latest final a/c for > than 2 years from date of year end closing. If FYE is 31/12/99,latest FA available is 31/12/97 then branches are to score zero.
- ## Mix type of securities (Categories I & II above).
- a) If the total values of securities are mainly (i.e. 50% and above) of Category I then branch is to use Category I security rating scores.
- b) If the total values of securities are mainly (i.e. 50% and above) of Category II then branch is to use Category II security rating scores.
